

With IRIS you make online eye contact. You forget the distance, the technique: it feels as if you are face-to-face in discussions. IRIS is the flexible alternative for video conferencing and fits perfectly at every desk. IRIS is always ready to use in combination with all web conferencing and video chat programs. A handy extra: you can use IRIS as a second monitor. The biggest advantage is however that IRIS even works if the others do not have IRIS. IRIS is therefore the most flexible tool on the market.

## IRIS: that feels like a face to face conversation

### Specifications

What do you need to be able to work with IRIS?  
A PC or Notebook with:

- Windows® XP or Windows Vista™
- Pentium® P4-processor (or compatible), 1.4 GHz (2.4 GHz recommended)
- 512 MB RAM (1 GB recommended)
- An internet connection (broadband recommended)
- A free USB 2.0 port
- A free VGA or DVI port
- 100/240 V, 50/60 Hz, 1.7 A supply

### Recommended accessories

IRIS works fine without the need for extra accessories. But in some situations they come in handy. Not all web conferencing / video chat programs uphold 'Acoustic Echo Cancellation' (AEC).

Besides, sometimes you do not want others to listen in during your conversations. The accessories in our program:

- **USB Conference Speaker phone with AEC**
- **USB VoIP phone**
- **Jack/USB headset**

Width : 41 cm  
Height : 87 cm  
Depth : 40 cm
